

# STRETCH IT. MOULD IT... BOBBLE IT

®

## FANCY FLOWERS INSTRUCTIONS

Before you begin, tape the two plastic halves of the vase together on the outside to make the vase shape.

### To decorate the vase

Take a small amount of the Bobble It compound and gently press around the outside of the plastic vase. You only need to cover with a thin layer. Keep adding different colours until you have completed your vase. The Bobble It compound will stick easily to the plastic without any need for glue.

Leave to dry for 24hrs.

### To make the flowers

You will need: Bobble It compound, 1 x flower back, 1 x flower stem, 1 x flower centre, 1 x flower cutter

Decide which colour Bobble It compound you want to use for your flower petals. On a firm surface flatten out the Bobble It compound. Using the flower cutters, cut out 6 petals and a flower centre and place them firmly onto the clear flower back. Choose one of the plastic flower centres, push it through the Bobble It compound in the centre of your flower and into the chosen stem. You will need to do this while the Bobble It compound is still wet.

Leave to dry for 24hrs.

Repeat until you have used all the stems.

Now you can display your flowers in your vase.
