

STRETCH IT. MOULD IT... BOBBLE IT

PICTURE PERFECT INSTRUCTIONS

Note - Each board has a picture on one side and a photo frame on the other.

Choose the board and side you would like to complete.

For the picture

Take a small amount of the Bobble It compound and 'colour in' your picture by gently pressing the Bobble It compound on to the board. Keep adding different colours until you have completed your picture. The Bobble It compound will stick easily to the board without any need for glue.

Leave to dry for 24 hours.

Note - leave one side to completely dry before starting the other side.

For the photo frame

Stick a favourite photo onto the middle of the board, use the Bobble It compound to decorate around the side of your photo. Take small amounts of the Bobble It compound and gently press it onto the board. To make a neat border on the inside edge of the frame, roll out some of the Bobble It compound into a long thin sausage shape and place around the outside edge of your photo. Make sure it is either sticking to the board or to the Bobble It compound.

You can make anything you like out of the Bobble It compound. We recommend flowers, hearts and animals. Place your decorations around the frame when the Bobble It compound is still wet as they will stick without the need for glue.

Leave to dry for 24 hours.

Your photo frame and picture can be displayed on the stands included, by gently bending the stand and placing your finished item on the stand.
